

CYCLE-1

1. Print your name to the screen with every letter being a different heading size

2. Display the following text:

H₂O
12th April 2016
HTML stands for ~~High Text Markup Language~~
He said <**I am fine**>

3. Print a paragraph with 4 - 5 sentences. Each sentence should be a different font.

4. Print a paragraph that is a description of a book, include the title of the book as well as its author. Names and titles should be underlined, adjectives should be italicized and bolded

5. Print two lists with any information you want. One list should be an ordered list, the other list should be an unordered list.

6. Prints 10 names with a line break between each name. The list should be alphabetized, and to do this place a subscripted number next to each name based on where it will go in the alphabetized list. (Example: Alan₁). Print first, the unalphabetized list with a subscript number next to each name, then the alphabetized list. Both lists should have an <h1> level heading

7. Print the squares of the numbers 1 - 20. Each number should be on a separate line, next to it the number 2 superscripted, an equal sign and the result

8. Print a definition list with 5 items.

9. Display an image that has a border of size 2, a width of 200, and a height of 200

10. Print ten acronyms and abbreviations of your choosing, each separated by two lines. Specify the data that the abbreviations and acronyms represent

11. Print two addresses in the same format used on the front of envelopes (senders address in top left corner, receivers address in the center

12. Create an HTML page with the following contents:

13.Create the following table

Time Table					
Hours	Mon	Tue	Wed	Thu	Fri
	Science	Maths	Science	Maths	Arts
	Social	History	English	Social	Sports
	Lunch				
	Science	Maths	Science	Maths	Project
	Social	History	English	Social	

1. 14. Create a HTML Page which looks like the one given below

Pochi the Cat

Introduction

Pochi was adopted from an animal shelter and now resides in Seattle, WA, where she runs a small but successful web page design business exclusively for cat clients.

Profile

- *favorite food* - smoked salmon
- *hobbies* - watching fishing on ESPN, snacking on garden flowers, monitoring the apartment parking lot
- *hidden talent* - karaoke

Links

- [Seattle Animal Control Shelter](#)
- [Humane Society of the United States](#)

CYCLE-2

1. Create an html page to display the following nested list
2. Create links to three different pages on three different websites that should all open in a new window.
3. Create a page with a link at the top of it that when clicked will jump all the way to the bottom of the page.
4. Display three different images. Skip two lines between each image. Each image should have a heading.
5. Display an image that when clicked will link to a search engine of your choice in a different window
6. Create the following Html Page using appropriate form controls
7. Create an image map for 'Kerala Map'. Map at least 3 districts so that when you click on that particular district the details regarding that district(**eg: population, Area, Tourist Spots(with images), Monuments, Interesting Facts)** should be displayed on a new page.
8. Construct this puzzle looking thing
9. Make up three image links for 3 web browsers and put them in a borderless table. Construct the table so that there is just a little space between the images.
10. Create the following html page using frames
11. Create an HTML page using frames which is similar to the following one. In the left frame provide hyperlinks to 3 important monuments in world. On clicking that hyperlink an image of the monument should be displayed in right frame with suitable description

CYCLE-3

1. Change the color of all <p> elements to "red".

2. Create all `<p>` elements will be center-aligned, with a red text color
3. Create CSS comment starts with `/*` and ends with `*/`.
4. Set the background color for the page to "linen" and the background color for `<h1>` to "lightblue".
5. Set the font family for the page to "Courier New", and the font family for `<h1>` to "Verdana".
6. Change the color of all `<p>` and `<h1>` elements, to "red". Group the selectors to minimize code.
7. Specify that the background image should be shown once, in the top right corner.
8. With the font property: Set the `<p>` to "italic", "20px" and "Verdana".
